Research Experience

- Jan 2026–
May 2026 Research Assistant, [Community Informatics Lab](#) — George Mason University (PI: Prof. Myeong Lee)
- Designed and deployed an end-to-end LLM pipeline (Python, Google Cloud Run, BigQuery) that collects U.S. K–12 news from NewsAPI, RSS, and state/district education sources and classifies AI adoption and use cases through a two-stage Gemini triage–extraction workflow with human validation; basis for working paper (W2).
- Aug 2025–
May 2026 Independent Researcher, [Honors Thesis in Economics](#), George Mason University (Advisor: Prof. Jason Dunick)
- *The Uneven Growth Cost of Political Instability*: constructed a multi-source macro–political panel of 185 countries (1960–2023; PWT, WDI, IMF, CNTS, Polity) and estimated heterogeneous growth effects of political instability using PCA-based instability indices and OLS, fixed-effects, and Difference/System-GMM estimators (STATA, R); presented at the Virginia Association of Economists and CHSS Symposium (T1, P1, P2).
- Jan 2025–
May 2025 Research Assistant, Seoul National University — Institute of Economic Research (with Ki-hong Choi)
- Extended a recursive-additive decomposition of chain-weighted superlative growth rates to the Japanese and North American (BEA) national accounts to restore additivity; prepared tables and slides for the World KLEMS conference and revised the manuscript (working paper W1).
- Mar 2024–
May 2025 Research Assistant, Seoul National University — Institute of Economic Research (PI: Prof. Hak Kil Pyo)
- Estimated industry-level productivity and built a GDP–labor–capital database for a Korea Development Bank project, running the main empirical analysis (VAR/IRF); maintained and updated the Korea Productivity Center's productivity and capital–labor accounts and contributed to work on AI and intangible investment in Korea (C1).
